

ATRACS Badgemaker

ATRACS BadgeMaker is Borer's ID Badge design and printing system. It's ease of use makes it the ideal choice for ID badge construction. It enables quick, efficient and low cost ID badge production.

BadgeMaker produces photo ID badges for employees and visitors. You create your own badge designs called templates, onto which your organization's details and card holder data are placed before a card is printed.

Badge templates are created using "What You See Is What You Get" drag and drop tools. Features such as transparent backgrounds, image ghosting, text centering, image rounding, foreground and background layering and text rotation are available.

The ability to create an unlimited number of badge templates allows for each department or user group to have its own unique badge design. Single sided or two sided colour or monochrome badges can be printed one at a time or as a batch.

The print preview feature displays the assembled badge prior to printing so that you can check on last minute changes.

Features:

Choice of Printing on ID cards using PVC dye sublimation card printers or on printed labels using low cost colour ink jet printers

Choice of Image Capture tools including live video from a frame grabber, digital camera, fire wire camera or web-cam

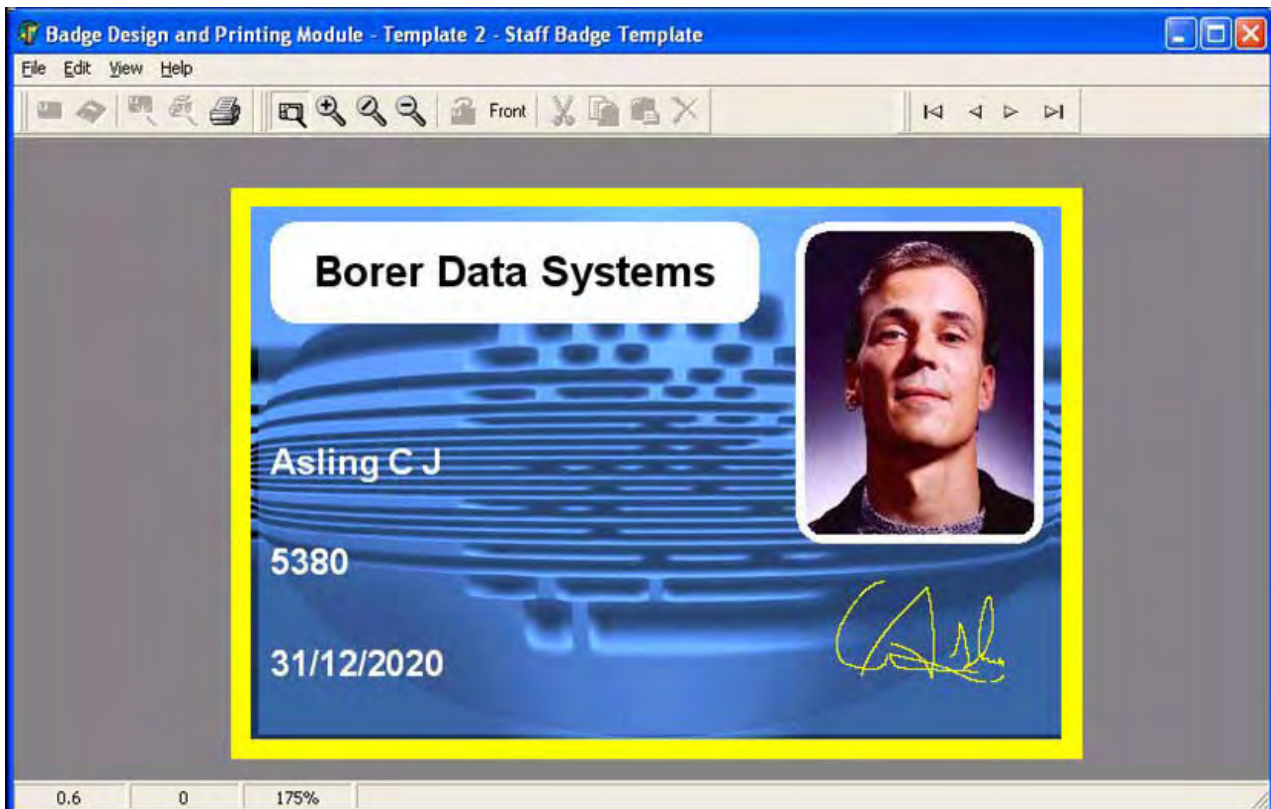

Support for all Windows fonts as well as most popular barcode formats

Multi-user Support enables ID photographs to be captured and badges printed from any number of sites

Password Security stops tampering with existing badge designs

Support for Unlimited Numbers of badge designs

Wizard Support to automate design and printing of ID badges

Badgemaker Advantages

Atracs BadgeMaker gives you the look and feel you're used to. You don't have to go through classroom training to design professional looking badges.

Custom card design capabilities lets you create different layout for different groups or departments. A change in company name or logo can be quickly incorporated into the ID card design at no cost.

Colour or black and white? It's your choice! Integrate the appropriate printer and camera to meet your needs.

A lost card doesn't mean lost time as the employee does not have to take time off to get his or her picture retaken. Simply reprint the card with the image already stored in the computer

Support for a vast array of printers. If your graphics printer has a windows driver, you'll probably be able to use it with BadgeMaker.

Support for duplex printing enabling the front and back of the card to be printed in one pass.

Wizard support to automate design and printing of ID badges.

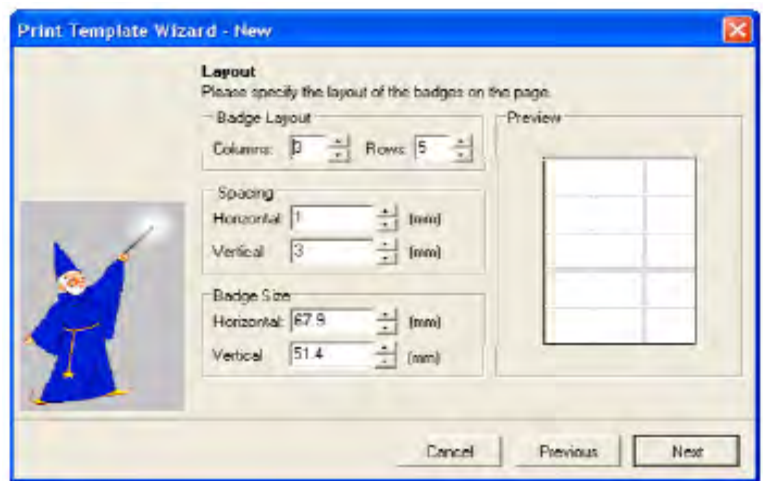

Client Server support so you can share information throughout the organisation. Its multi level password security ensures that only authorized personnel can build or modify card designs, or alter database information.

Custom badge designs including company logos and custom graphics.

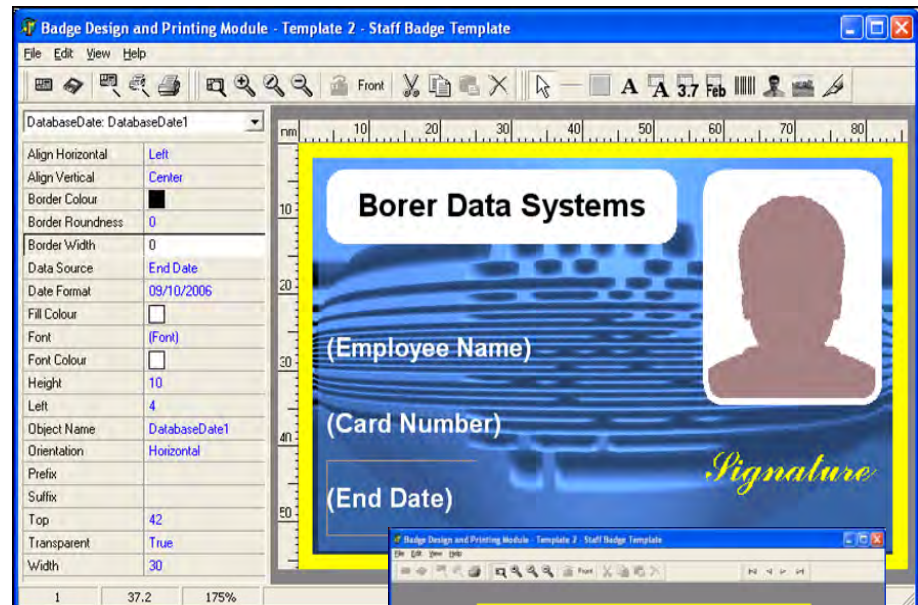

Background images captured directly through the video camera.

Personalise badges at a fraction of the cost of custom printing, and you won't have to wait months for them!

Add security to your badge design by including features such as rounded corners on the border of the photograph, ghosted image on the background design, transparent text box with text overlapping the edge of the photograph, watermark effect on the resin overlay, etc.
